

What DO YOU Think

Greetings:

I think that you should be thanked and congratulated for printing the article “*You Have Been Lied to Again*”. Copies should be distributed to schools and libraries. Other technical organizations as well as social groups all should be aware of the facts of global warming, the Gore video predictions of rising ocean levels, extreme heat and polar bear extinction just cannot be proved. Yet no debate has been allowed and the proponents of global warming now assume the character of saints and are not to be questioned.

How arrogant to presume that we can control the seasons when geological history has recorded several ice ages and warm periods all due to activity of the sun. So, keep spreading the truth.
Best regards, Bruce A. Johnson, Sr.

Hello Pattie:

I'm an AOA member and have been for quite some time. Being a member of your organization has been quite rewarding and helpful for me. I am writing this email to you to express my concern over the content of the Apartment Owners Association News magazine that I receive. I'm finding the magazine much too political (right wing) for my tastes. Everyone is of course free to believe anything they want but I simply don't feel that using the magazine as a forum to express opinions regarding global warming, evolution, or God/Christianity is appropriate or warranted. I was expecting/hoping that the publication would stick to topics related to landlording & property. I find myself unable to support the viewpoints of your organization and will not be renewing my membership when it expires.

Thank you to you and your association for making my landlording business easier to run and manage. I wish you all the luck in the world.
Sincerely, Constantine K.

To the Editor:

I agree fully with Brock regarding the tone and type of letter he refers to. The writer assumes that all members of the AOA are of their opinion and want to hear about their opinion. I personally am not on the right side of the political spectrum and don't believe this type of article is something I want to see in the industry publication. It belongs more on the Opinion page of the local paper.
Cheers, Ron Stocks

To the Editor:

I completely agree with Brock Harris' letter in the 11/08 AOA magazine.

Lynn Mingori, member

Dear Editor:

With regard to Brock Harris' letter, we do not agree. Informing your readers about the Global Warming Hoax is important. The financial meltdown coming to California from AB32 will rival what is now happening in the destruction of the financial industry by Washington. We must take action against this coming financial Tsunami from Sacramento and certainly the first step is to inform and educate your readers. Mr. Brock

Harris needs to wake up before it is too late. Please email me a copy of Edward Blick's article so I can send it on to others. *Best regards, Barbara Bentley & Howard Sachar*
